PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in IT support, networking, and backend development. Completed an internship at Bank of Abyssinia providing technical support, network troubleshooting, and system maintenance. Skilled in building REST APIs with Java (Spring Boot) and Node.js (Express.js), working with relational and NoSQL databases, and deploying applications on AWS, Azure, and GCP. Passionate about combining software engineering, cloud technologies, and machine learning to build scalable, real-world solutions.

EDUCATION

Bachelor of Science in Computer Science

University of Gondar

Relevant Coursework: Operating Systems, Data Structures & Algorithms, Software Engineering, Database Systems, Computer Networks

WORK EXPERIENCE

IT Intern — Bank of Abyssinia, Ethiopia

- Provided technical support to employees by diagnosing and resolving hardware and software issues.
- Troubleshoot network connectivity problems and user access issues, and supported OS installation, configuration, and maintenance.
- Collaborated with senior IT staff to resolve infrastructure-related issues and assisted users with technical guidance.

Freelance Backend Developer — Self-employed

- Developed backend applications and RESTful APIs using Spring Boot and Express.js.
- Designed secure authentication and authorization systems using JWT, and integrated PostgreSQL and MongoDB databases.
- Collaborated with clients to gather requirements and deliver functional software solutions, including deployment and testing.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++

Backend Development: Spring Boot, nest.js, Express.js, REST APIs, JWT Authentication, Microservices

Databases: PostgreSQL, MongoDB, SQL, Prisma ORM, Hibernate/JPA

Cloud & DevOps: AWS, Microsoft Azure, GCP, Docker, Kubernetes (basic), Git/GitHub, CI/CD

Networking & IT Support: TCP/IP, DNS, DHCP, VPN, OSI Model, Windows/Linux Administration

AI & Machine Learning: NumPy, Pandas, Scikit-learn, Data Preprocessing, Classification & Regression

PROJECTS

Food Delivery Management System (Spring Boot)

Backend system with authentication, restaurant management, and order processing, built with Spring Boot and PostgreSQL using layered architecture.

AI Smart Resource Management System (Node.js)

Resource allocation system for university operations with role-based access control and AI-driven decision-making logic.

Self Tracker Analytics System (Python)

Personal analytics platform using Google Takeout data; applied data cleaning, visualization, and machine learning with Pandas, NumPy, and Scikit-learn.

Socket Programming Web Server (C++)

HTTP web server built with raw socket programming, implementing request/response handling.

CERTIFICATIONS

- AWS Cloud Training
- Microsoft Azure Fundamentals Training
- Google Cloud Training
